

Imperial Valley Care CMHC

Accessibility Statement

Imperial Valley Care CMHC aims to provide a website that is clear, usable, and welcoming to as many people as possible.

Statement updated September 21, 2026

Our Accessibility Goal

The website is designed toward the Web Content Accessibility Guidelines (WCAG) 2.2 Level AA. Accessibility is an ongoing practice, and the site may not work perfectly with every device, browser, or assistive technology.

Features in the Current Website

The current implementation includes semantic headings and landmarks, a skip link, keyboard-accessible navigation, visible focus indicators, descriptive link text, form labels and an error summary, responsive layouts, zoom and reflow support, and reduced-motion support.

- Navigation is available without JavaScript.
- Main interactive targets are designed to be at least 44 by 44 CSS pixels.
- Images include alternative text when they convey content.
- Color is not the only way interactive states or form errors are communicated.

Using This Website

You can use the keyboard to move through links, buttons, and form fields. The mobile menu can be opened from its summary control and closed with the Escape key when JavaScript is available.

The layout is intended to reflow without horizontal scrolling at common mobile sizes and when text is enlarged.

Contact Us About an Accessibility Issue

If you have difficulty using this website, contact Imperial Valley Care CMHC by phone or email and describe the page, task, and assistance you need. We will use the available contact channel to understand the issue.
